

PROFESSIONAL SUMMARY

Computer Science Engineering student and Software Developer specializing in Android development and C++ programming. Experienced in building production-ready Android applications using Java, REST APIs, Firebase, and SQL. Strong understanding of OOP, Data Structures & Algorithms, SOLID principles, and clean architecture. Skilled in performance optimization, scalable application design, and writing efficient, maintainable code.

EDUCATION

Chandigarh Group of Colleges, Landran

B.E in Computer Science Engineering | CGPA: 8.56

DAV Sr. Sec. Public School (CBSE)

Matriculation: 79% (April 2019 – March 2020) | Intermediate: 82.4% (April 2021 – March 2022)

August 2022 - June 2026

SKILLS

Programming Languages: Python, C++, SQL, HTML, CSS, Java script
Mobile & Backend: Android (Java, XML), Spring Boot, REST APIs, Firebase, Webhooks
Tools & Frameworks: Gradle, Thymeleaf, Git, GitHub, Figma
Databases: SQL, MongoDB
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design
Methodologies: Microservices Architecture, Agile/Scrum

PROJECTS

- E-Commerce – Digital Classes (Android | Java | XML)**
- Created a mobile learning solution supporting 100+ users for educator–learner coordination.
 - Delivered 6+ functional units covering virtual sessions, submissions, presence logging, profiles, and curriculum control.
 - Connected server endpoints through web interfaces to maintain live consistency across academic records.
- News API Application (Android | Java | REST API | Firebase)**
- Assembled a real-time bulletin platform distributing 100+ daily stories from external providers.
 - Organized 5+ information sections with on-demand loading across multiple interest areas.
 - Processed network exchanges within ~300 ms through optimized request handling and response decoding.
- Netflix Data(Python)**
- Netflix dataset contains movies and TV shows details.
 - Data includes title, director, cast, country, rating, duration.
 - Data cleaning removes duplicates and handles missing values.
 - Converted release date into proper datetime format.
 - Extracted year for trend analysis.

Certifications

- AWS Academy - Cloud Security Foundations
- Android Technology - Think Next
- Automation Developer Associate - UI Path (ICT Academy)
- Database Management Systems - NPTEL
- Python for Data Science - Udemy
- HTML Attributes & Tags - Great Learning
- Generative AI Mastermind – Outskill
- Data Science using Python - Tech Live Solution

Interests & Learning

- Android development
- Data Structures & Algorithms
- Clean code practices
- Application performance optimization

Community Involvement

- Blood Donation (Camp Volunteer & Donor)
- PGI Food Donation Camps (Volunteer)
- Manya Sethi Foundation: Volunteer
